

ZACHARY STURMAN

AI Software Engineer

Seattle, WA | zasturman@gmail.com | 206.554.1124

zacharysturman.com | linkedin.com/in/zacharysturman | github.com/ZSturman

Languages: Python, TypeScript, JavaScript, SQL, Rust, Swift

Frontend: React, Next.js, React Native, Tailwind CSS, Redux, XState

Backend / Cloud: FastAPI, REST APIs, Firebase Auth, Firestore, PostgreSQL, Redis, AWS, Docker, GitHub Actions

AI / Data / Testing: PyTorch, TensorFlow, Scikit-learn, Pandas, NumPy, OpenCV, Pytest, Cypress, Postman

AI Software Engineer, Web Platform

The Wolf Project | Remote | Mar 2026 – Present

- Architect and build a production-ready full-stack nonprofit web platform using React, Firebase Auth, Firestore, and responsive UI architecture to support fundraising, content, and user workflows.
- Integrate Zeffy donation tracking, Shopify e-commerce contribution flows, Cloudinary media management, and Firebase backend services to support user access, and content operations.

Full-Stack Software Engineer

Production Scheduling Desktop App | Client Project | Dec 2024 – Jul 2025

- Built a cross-platform scheduling application using React, Tailwind CSS, Firebase Auth, Firestore, and Google Sheets as the system of record for centralized production scheduling.
- Implemented multi-user access control, synchronized state, role-based permissions, timeline/table views, error handling, and predictable sync behavior for reliable daily operations.

Full-Stack Software Engineer

TowardBetter.me | Contract, Remote | Oct 2024 – Feb 2025

- Designed and built a functional prototype and public announcement site using React, Next.js, Firebase Firestore, form handling, client-side validation, local storage persistence, and state management.
- Translated early-stage product goals into deployable web architecture, structured data models, and maintainable implementation plans for rapid iteration.

Mobile Software Engineer, AI/ML Integration

Lost & Hound | University of Melbourne Collaboration | Feb 2024 – Oct 2024

- Built and maintained a React Native mobile assistance application with focus on frontend architecture, performance, usability, and maintainable component design.
- Integrated a Python-based computer vision pipeline using OpenCV and ML tooling with PostgreSQL-backed data storage for structured application data.

Business Intelligence Engineer

Ameristar Casino | Denver, CO | Apr 2017 – Oct 2023

- Built analytics dashboards and reporting workflows combining React-based UI development with Python, Pandas, NumPy, and Matplotlib data analysis pipelines.
- Translated operational questions into repeatable reporting tools and visualizations supporting higher-frequency table games analytics.

Casino Dealer

Snoqualmie Casino + Ameristar Casino | Seattle, WA / Denver, CO | Apr 2017 – Present

- Managed high-volume table operations requiring accuracy, risk awareness, and real-time customer communication.

EDUCATION & CERTIFICATIONS

B.S. Media Communication, Full Sail University | Google Certified Data Analyst | AWS Certified Cloud Practitioner
